SecureLearn®

Reducing Recidivism by Precisely Securing Access to Online Education

Individuals receiving educational courses in prison are 43% percent less likely to be re-incarcerated. Recidivism rates in the United States currently sit at around 50%.

SECURE ONLINE EDUCATION

SecureLearn is a controlled Internet access platform to grant access to high risk users.

User are provided with access to online skill building resources: educational, vocational, life skills, mental health.

Only Internet resources designated by the agency and facility's staff are configured and accessable.

REDUCE RECIDIVISM

SecureLearn addresses the security concerns that have traditionally prevented corrections stakeholders from permitting Internet access within their facilities.

SecureLearn removes equity barriers that have hindered access to resources that promote rehabilitation and improve reentry success.

> Education and employment are the largest contributors to an incarcerated individual's successful reentry.

FIRST THE FACTS

- ✓ Fact: The *average* total cost per incarcerated individual is $33,274 per *year*.

- ✓ Fact: Recidivism rates in the United States currently sit at around 50%.
